SUMMER PROGRAMS GUIDE

LONG ISLAND'S GUIDE TO COURSES, CAMPS AND SEASONAL FAMILY FUN

..... ☀️

Despite freezing temperatures, parents and children across Long Island are excitedly planning for summer. With schedules upended and screen time at an all-time high, both generations are looking forward to the normalcy of summer break and the opportunity to have fun, make new friends and learn new skills safely.

In this special feature, we'll provide advice and information to help kids – from pre-school to pre-college age – explore their interests, discover STEM/STEAM talents and/or improve their GPAs with accredited college courses. Look inside for the program that's right for you and your child.

SPECIAL ADVERTISING FEATURE

The Best Summer Programs for Your Child

Summer may be months away, but when looking for fun and educational programs that will fill your child's summer, now is the best time to do your research, and more importantly, secure your space. Selecting the best options for your child may be challenging, given the many exciting and diverse choices available. These suggestions will help make the summer camp process easier – and ensure that your child will truly be a “happy camper!”

TALK WITH YOUR CHILD

Ask about his/her interests and expectations for summer vacation, and share your expectations, too. The answers may surprise you and may create options you hadn't considered before. Narrow your search to camps and programs that are best matched to your child's interests.

SLEEPAWAY CAMP VS. DAY CAMP

Both offer a variety of programs with interest-specific activities and opportunities for socializing and learning, and in this age of coronavirus, both also enforce COVID-19 health and safety protocols. Before you decide what's best for your child, consider your child's temperament and maturity level. Would your child acclimate better at a sleepaway camp or a day camp that is closer to home?

DO YOUR HOMEWORK

Look on the camp's website to get a better idea of what they offer, their overall mission, their COVID-19 protocols, and to determine if it would be a good match for your child. Be sure to check online reviews and testimonials, talk with friends and family, and if necessary, speak with the camp staff about any questions or concerns you may have.

ATTEND OPEN HOUSES

Make plans to attend in-person or virtual open house events at the camps that top your list. Check their website for dates as soon as possible since many will be taking place over the next few weeks. Bring your child along and ask questions such as: How is the staff screened and trained? What is the camper-to-counselor ratio? What COVID-19 health and safety policies do they have in place?

The DNA Learning Center offers fun and challenging 5-day summer camps for students entering grades 6–12. Budding scientists are immersed in hands-on activities and experiments that deepen understanding of DNA science concepts and techniques.

In-person campers can participate at our Long Island and Brooklyn locations. **Virtual** campers receive a kit of materials and connect virtually with instructors or access on-demand recorded videos.

The DNALC will follow prevailing CDC guidance for in-person programs.

SPECIAL ADVERTISING FEATURE

Prepare for the Future with Pre-College Summer Learning

High school students can give themselves an academic advantage by enrolling in pre-college level courses during the summer months, available at colleges and universities throughout Long Island, including Adelphi University and Hofstra University. Aside from acquiring college-level credits, there are a number of benefits a summer class affords, including:

TIME IS ON YOUR SIDE

Since summer classes tend to be shorter in duration, high schoolers can better their academic records and still have plenty of time to enjoy the season.

EXPERIENCE COLLEGE

High schoolers will have a chance to explore the campus with less crowded in-person classes, via virtual courses or, in some cases, as a hybrid model that offer both in-person and online programs.

MORE ATTENTION

Summer classes are usually smaller in size than courses held during the Fall and Spring semesters, which means professors can provide more individualized attention to each student.

EASES THE COLLEGE SELECTION PROCESS

Summer students can use this time to determine if the school (or type of school) is one that they can see themselves attending in the future. Campus size, areas of specialty, campus life, and where available, clubs and activities can be explored.

MEET NEW FRIENDS

Taking pre-college courses creates opportunities to meet new friends – many that share the same interests. These new friendships can help make studying easier and summer classes more fun.

To learn more about summer pre-college classes on Long Island, visit college websites or speak with your high school's guidance counselors.
